SUMMARY

Technology professional with 4+ years of experience across multilingual content operations, workflow automation, and data validation. Hands-on with Python, SQL, and API testing to build automated checks, resolve formatting and data-integrity issues, and streamline complex, multi-stage pipelines. Proven ability to manage end-to-end project workflows, coordinate cross-functional and distributed teams, and drive process efficiency in fast-paced, detail-intensive environments.

CORE SKILLS

Technical: Python, SQL, R (Basics), Java, C++, Power BI, Excel, Data Analysis, Data Visualization, API Testing (Postman), Data Validation, Jira, Amazon SageMaker, Docker, Git, Regex, HTML, CSS, NetSuite, Beyond Compare, PDF Tools, ChatGPT, Claude, NotebookLM, AI Agents

Localization & QA Tools: Smartcat, Phrase, CAT Tools, Verifika, WPML, SCORM Packaging, Evolve Authoring Tool, Happy Scribe, Zoho, HubSpot, Figma, Upwork

Languages: Proficient English, Advanced Marathi, Advanced Hindi

PROFESSIONAL EXPERIENCE

Localization Engineer – Content Department | Wordsburg Pte. Ltd — Mumbai

03/2026 – Present

- Manage end-to-end localization workflows — project preparation, file processing, post-localization activities, and final delivery — across concurrent multilingual projects.
- Upload, organize, and manage multilingual localization projects in Smartcat CAT tools, tracking status through to completion.
- Perform functional and linguistic QA across multi-format content (DOCX, SRT, VTT), identifying, documenting, and resolving formatting and content-quality defects prior to delivery.
- Run automated QA checks in Verifika to flag formatting and consistency issues at scale across delivery files.
- Validate operational and scheduling data in Zoho and track QA tasks and workflow status in HubSpot, applying structured, test-case-style tracking across concurrent projects.
- Manage Figma-based asset workflows — building asset-tracking sheets that map assets and iFrames, uploading video/audio files into Figma, and re-integrating translated assets post-localization — while reviewing UI and content alignment for visual and functional QA.
- Support the DTP team with basic-level desktop publishing tasks, including fixing formatting issues and creating editable source files from PDFs using standard PDF editing tools.
- Convert subtitle files (SRT/VTT), export SCORM-compliant e-learning packages, and integrate localized audio, video, and content into Evolve courses; support multilingual website localization using WPML.
- Coordinate with freelance translators and distributed contributors via Upwork, monitoring quality and progress to ensure on-time, defect-free delivery.

Freelance Localization Engineer | Self-Employed — Remote

01/2026 – 03/2026

- Executed end-to-end localization workflows and validated multilingual content for linguistic and formatting accuracy.
- Processed and prepared content for translation using CAT tools and APIs, ensuring readiness for downstream delivery.
- Conducted multilingual audio quality assurance using an Amazon SageMaker-based annotation tool — validating recordings against project guidelines, documenting quality issues, and approving or rejecting audio files against acceptance criteria.

Localization Engineer | Andovar — Mumbai

01/2022 – 12/2025

- Planned and executed workflows for exporting, translating, and re-integrating content using client files and APIs (e.g., Postman), ensuring smooth localization across platforms.
- Used machine translation engines (Google Translate, Microsoft Translator, DeepL) to accelerate translation, followed by detailed post-editing for quality assurance.
- Performed internationalization and pseudo-localization testing to ensure software readiness for global users.
- Streamlined localization processes through API integration, reducing turnaround times and improving efficiency.
- Verified translated content and re-integrated it into production environments with accuracy and consistency.
- Diagnosed and resolved technical issues related to translation memory (TM), scripts, and project workflows, ensuring timely and smooth delivery.
- Maintained and updated translation memories (TM) and terminology glossaries within CAT tools to ensure linguistic consistency across projects and target languages.

- Tested localized builds for functional and linguistic accuracy, tracking issues through to resolution to support stable, on-time releases.
- Created custom Python scripts to automate repetitive tasks, boosting productivity and reducing manual work; performed in-depth API testing to ensure integrations were functional, accurate, and reliable.
- Trained and mentored interns on localization workflows, technical troubleshooting, and best practices.

KEY HIGHLIGHTS

- Automated manual QA and data-processing workflows using Python and API testing (Postman), reducing manual review effort and improving turnaround time.
- Applied structured, test-case-style QA methods and automated tooling (Verifika) to catch data-integrity and formatting defects before delivery.
- Built hands-on experience in data annotation and validation pipelines through multilingual audio QA using Amazon SageMaker.
- Bridged localization engineering with design and DTP workflows — managing asset tracking and integration in Figma and handling basic desktop-publishing fixes across file formats.

EDUCATION

Bachelor's Degree in Computer Science | Mumbai University, Mumbai, India
Cumulative GPA: 9.19/10

06/2018 – 04/2021

CERTIFICATIONS

Data Fundamentals (IBM) • Power BI (Coursera) • Machine Learning (Udemy) • API Testing (Postman) • AI Practitioner: Ready to Use and Shape AI (IBM) • Quick Introduction to Postman and API Testing for Beginners

PROJECTS

- Personal Portfolio Website — Designed a responsive website to showcase projects and technical skills using HTML and CSS.
- AI SuperApp — Developed a Python-based AI application integrating automation and intelligent task execution.
- Virtual Desktop Assistant — Built a voice-enabled Python assistant to automate tasks using natural language commands.
- AI Localization QA Assistant — Created an AI tool to automate localization QA by detecting content and formatting issues.
- 12-Week AI Agents Curriculum — Designed a self-paced, 12-week learning curriculum on AI agents, using ChatGPT, Claude, and manus to research and structure course content.
